– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-4, in the reply filed on January 17, 2006 is acknowledged. The traversal is on the ground(s) that the search for the elected invention would necessarily entail a search for the non-elected invention. This is not found persuasive because the Group II apparatus can be used for other processing and because the Group I apparatus can be used for methods other than the Group III methods. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, last paragraph, "material supporting member" and "ceiling thereof" and "stages of periphery wall portions" and "ring-like horizontal" are written in narrative form and should be more clearly described.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Applicant's Admitted Prior Art (AAPA) or JP2000036370A further in view of JP355165288A and further in view of JP404224628A. AAPA and JP2000036370A are very similar. JP355165288A shows (Fig 1) a chamber having plural diameter portions. JP404224628A describes (English Abstract, last two lines) the use of a shielding body to prolong the apparatus service life. The use of plural chamber diameters in the AAPA or JP2000036370A apparatus would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the shape change will prolong the apparatus service life. The limitations of Claims 2-4 can be found in AAPA (Specification, pages 1-5) and would have been obvious apparatus features at the time applicant's invention was made.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to energy beam systems.
